

A Nurses Guide to Caring for Cardiac Intervention Patients

Cardiac intervention is a fast expanding field of medicine that is reducing the need for cardiac surgery. A Nurses Guide to Caring for Cardiac Intervention Patients will enable nurses to fully prepare their patients and families for various cardiac intervention procedures. Coverage includes: Explanations of what the heart condition is and how the procedure may relieve that condition Descriptions of what the patient can expect to happen before, during and after the procedure What nurses should observe for post procedure, and how to address any complications that may occur Guidelines for discharge advice Outlines for a pre and post care plan for each procedure based on the latest research and experience. Nurses will find the book informative on common interventional procedures, but it is also designed as a tool to be dipped into when caring for patients with more unusual procedures. This practical book includes chapters on: cardiac catheterisation; percutaneous coronary intervention; percutaneous balloon mitral valvuloplasty; removal of femoral sheaths; cardioversion; temporary and permanent pacemakers.
