

# Assessment of antenatal and obstetric care services in a rural district of Nepal (Medizin in Entwicklungsländern)

This text provides a thorough analysis of maternity services in Nepal. The following issues are highlighted: Low acceptance and use of antenatal care; risk approach and screening; reasons and extent of use of hospital-based obstetric care; quality of care and health worker - client interaction. This is complemented by a community-based study, addressing the community, perception of pregnancy-related problems, choice of care-giver and the communities assessment of modern maternity services.
