

International Review of Cytology, Volume 211 (International Review of Cell and Molecular Biology)

International Review of Cytology presents current advances and comprehensive reviews in cell biology--both plant and animal. Articles in this volume address such topics as cytoskeleton-dependent transport and localization of nRNA, special cytochemistry in cell biology, plasticity and stabilization of neuromuscular and CNS synapses, adipokinetic hormones of insects, and iron metabolism in mammalian cells. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.
